

# THE BIOSPHERES OPTIMIZATION SYSTEM (BOS 318)

## Bioactive Protection Against Electrosmog and 5G

We cannot escape the electromagnetic radiation cloud we live in and with the rollout of 5G, we will get an even stronger and more harmful toxic microwave impact. What are the consequences? An excerpt from an International Scientists' Petition Against Radiation Exposure (from 42 countries, 2015): *"The health consequences include an increased cancer risk, cellular degeneration and toxification, memory and neurological problems, and negative effects on the general wellbeing of humans. Because of the shallow penetration of the microwave frequencies, eyes and skin are particularly affected. We humans absorb over 90% of the radiation via our Epidermis and Dermis layers. 5G should be regarded as extremely harmful to biological systems and we can expect serious negative consequences for our eco systems."* **What is the solution?**

When we create energetic fields which mimic undisturbed nature, our brain recognizes these primordial, natural stimuli oscillations and instantly synchronizes with them. It is like moving the disturbing frequencies far away from you or switching them off. As a result, the biosphere around you resembles an undisturbed, healthy environment again. You can enjoy a restful sleep and all your biological parameters start to normalize. Concentration, reaction speed and other important neurological capabilities improve significantly too.

The BOS 318 was primarily created for the energetic stimulation of the CNS and ANS. The intensity of the created magnetic field is gentle, but effective. This is achieved by the amplitude of the magnetic field which creates frequencies of the same intensity as in our body and ideal frequency patterns corresponding to the biological window. The frequency intensity is enough for effective resonant stimulation, but cannot force the nervous system, nor the brain responses if there is no need at that moment. The BOS 318 can be used in the following circumstances:

- Recreation rooms near W-LAN systems or W-LAN amplifiers.
- Living areas near 5G facilities. These are especially aggressive biologically.
- Areas near radio towers.
- Computer workstations, computer screens.
- The use of mobile and portable computer systems (Laptop).
- Staying in modern hotels (which are now completely networked). E-smog is present everywhere.
- Bedroom (The bedside table is an important application place).
- Staying near airports or electrified transport facilities.
- Modern motor vehicles and vehicles with electric motors.
- Modern trucks and buses. These are completely electromagnetic interference bodies.
- Travelling on metal hull ships/airplanes (Faraday cage and e-smog everywhere).
- Working with machines which have a high-power consumption.

## MAIN FEATURES:

The device generates energetic fields which you normally find only in undisturbed, pristine nature. Under ideal cognitive circumstances our brain also creates these energetic fields naturally. The brain recognizes this positive bio-energetic state and synchronizes itself with these stimulating frequencies. The brain does not react to these harmful microwave frequencies anymore, it just ignores them and instead tunes into the natural, beneficial signals of the BOS 318.

The BOS 318 has photon sources that emit light which is identical to the natural light. These frequencies are also modulated with natural sunlight frequencies, called 'solar noise'. All natural radiations are modulated by this frequency spectrum. Nature and all living beings developed under this light spectrum.

The BOS 318 also has an integrated Tesla coil, which generates a Scalar field. We can create nature-like Scalar fields with Tesla coils. When we input a pulsating current, known also as Schumann frequencies into a Tesla coil, the system creates beneficial, nature-identical energy fields.

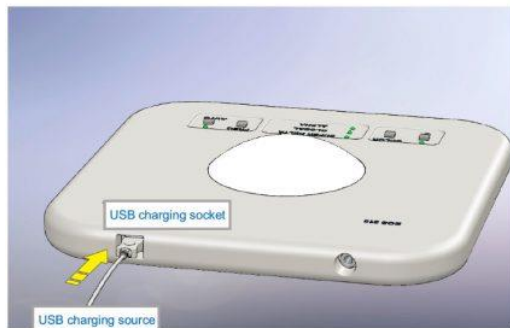

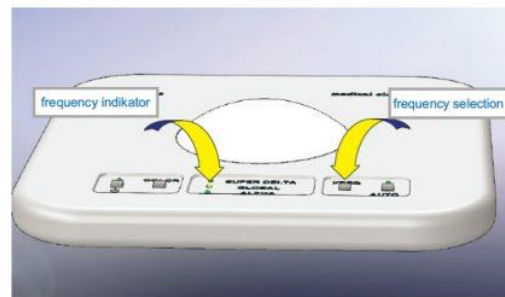

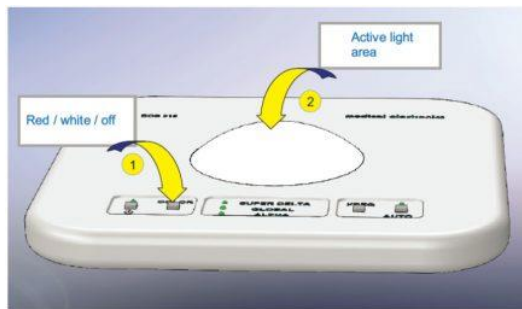

It comes with three main frequencies corresponding to brain frequency Super-Delta (1.2 Hz), Global Earth resonance (Schumann 7.81 Hz) and brain Alpha (10.4 Hz) modulated by the sun noise.

You can additionally connect any MP3 device for selected modulations such as mantras, prayers, meditations, or other audio frequencies generating devices.

The BOS 318 can be operated in a manual and automatic mode, i.e. frequencies and colors can be selected as needed. The device can be charged through your computer UBS cable or directly plugged into your power grid socket.

## TECHNICAL DATA:

- Photon Source: Red 630 nm 6,000 mc / White 11,000 Kelvin
- Magnetic field: Tesla coil with approx. 70% scalar
- Field strength approx. 750  $\mu$ T
- Frequencies: 1.2 Hz / 7.81Hz / 10.4 Hz
- Power supply: Lithium rechargeable battery pack 3,6V 650 mAh
- Current consumption: 40-180 mA
- Charging time: approx. 4-6 hours
- Charging current: mini USB jack 300-800 mA

## HEALTH BENEFITS:

Your brain cannot differentiate between primordial natural and man-made pristine energetic fields like those of the BOS 318. When the fields are identical in frequency and amplitude with the natural fields, they have the same positive effect. Your body and brain feel as if they were in undisturbed nature.

The BOS 318 creates these beneficial energetic fields just like nature. The brain recognizes this ideal, natural energetic environment and tunes into it with some of the following effects:

- Your blood circulation, blood pressure, pulse and breathing normalize and relax
- Muscle cramps, spasms, and contractions are relieved
- With darkfield microscopy we can observe the un-clumping of red blood cells taking place; the risks for thrombosis, heart attack and strokes diminish significantly

## HEALTH BENEFITS (Continued):

- **Light waves just like those of natural daylight:** The spectral composition of daylight drives the biological rhythm and the hormonal composition of blood. These chronobiological impulses are controlled by the pituitary gland through the photons which are absorbed through the eyes. When the eyes receive the full spectrum of daylight all hormones can be produced in ideal composition by our body. You feel balanced, creative, fit and healthy as your body can face the daily immunological burdens much better.

- **Light waves just like those of a natural sunset:** When the sun approaches the horizon, the long wave parts of light dominate, meaning that the red/orange spectrum is predominant. Your pituitary and pineal glands now produce more Melatonin. This hormone fulfills many important functions within the body. Amongst others it is responsible for a healthy, restful sleep. Mobile phone radiation as well as Wi-Fi, UMTS, 5G and other types of microwave radiation inhibit Melatonin production. Many LED therapy devices available on the market today are missing this necessary red spectrum. The resulting Melatonin deficiency is one of the main causes of sleep disturbances.

- BOS 318 generates a scalar field which is efficiently fading out the field disturbances and creates an electro-biological feel-well climate for work and recreation. The Scalar field created by the built-in Tesla coil covers over disturbed EMF until this becomes irrelevant. Thereby you can protect your nervous system from a harmful, radiation-infested environment. The biologically active range of the Scalar field, the wellness cocoon, which the BOS 318 creates around you, reaches to about 8-10 m (26-33 ft.). This range enables you to easily cover your office or living spaces. The BOS 318 also protects you from the harmful radiation your computer produces.

## HEALTH BENEFITS (Continued):

- The BOS 318 creates an energy cloud around you that is filled with beneficial frequencies. This makes you extremely resilient to the electromagnetic radiation of our modern lives.
- **Super Delta Frequency:** The slowest known brain frequency is the Super Delta Frequency. It ranges from 0.5-1.8 Hz. The amplitude is very low (0.5-20nV) and its frequency is variable. This brain frequency stimulates the pineal gland, responsible for Melatonin production. Melatonin is known as an anti-aging hormone, a very potent immune-stimulant and recently an anti-carcinogenic. This frequency stimulates production of endorphins, improves your mood, reduces pain sensations, regulates pulse and blood pressure.
- **Global Frequency:** The Global Frequency, also known as "Earth's resonance frequency or Schumann frequency", is the natural energetic vibration frequency of the earth's electro-magnetic field. This frequency tells the brain 'Everything is OK'. It is the classic relaxation and feel well frequency. This brain frequency is efficient against all kinds of bio-energetic disturbances of high and low frequency electrosmog. Especially unwanted reactions to cell phone and 5G frequencies are neutralized. This frequency improves adaptation capabilities to circadian rhythm, reduces jetlag after flights, classic wellbeing and feel well frequency, effective help for addiction therapy (cigarettes, alcohol, etc.), improves immunity to electrosmog.
- **Alpha Frequency:** Alpha Frequency is responsible for relaxation, balanced blood pressure and a well-adapted pulse. According to the body's needs those parameters can adapt more quickly to the environment. Alpha frequency is also known as the "super-learning" frequency. It improves learning capabilities significantly and optimizes memory functions. Many students use this function for exam preparations. Alpha frequency stimulates production of serotonin and endorphins and thereby has stress-relieving action. This frequency induces deep relaxation, effortless heightened attention, improvement of clear thinking capabilities, super learning, and reduces uncontrolled muscle movements.

### SCOPE OF DELIVERY:

- 1 x Biosphere Optimization System BOS 318
- 1 x mini USB charging cable
- 1 x Audio connection cable
- 1 x Operation manual in English
