Test Set Resources

Compiled by **Carolyn L. Winsor** for **Praxis2Practice** Supporters

15 November 2021

Presented in no particular order for informational purposes only.

Med-Tronik / MORA & MORA Nova: I recently updated my MORA Nova (typically complicated and requiring remote assistance to load) and also purchased the new test sets:

- 1) **CoVid-19** Test Set: includes Test ampules [*Nosodes*], Vaccines [*all 4 of them*], Trace Elements, Vitamins and Allopathics [*HCQ, Azithromycin and Ivermectin!!*]
- 2) **Be-Life** Test Set: includes Fatty acids, Enzymes, Vitamins, Amino acids, Complexes [*most appear to be beauty oriented*], Plant concentrates [*includes a few of the items Dr. K. recommends*], Minerals and Super regenerators
- 3) **MEDMIX 2021** Test Set: includes Painkillers, Muscle relaxants, Hypnotics, Psychotropic drugs, Anti-epileptic drugs, Sedatives (Parkinson's), Antihypertensive drugs, Cardiacs, Antibiotics, Antivirustics, Anticoagulants, Cortisone, Antiallergic drugs, Diuretics, Cholesterol lipid lowering agents, Intestinal bacteria, Urologics, Miscellaneous, Antimycotics and a nice list of Homeopathic vaccination nosodes.

If you have MORA/Med-Tronik Electronic Homeopathy (ELH) or NOVA remedy software, please contact Ms. Nicola Fronmüller at support@med-tronik.de for details, pricing and delivery.

BioKat Systeme / BioKat M V: BioKat also has virtual Covid Nosodes in D3 to D400 potencies plus a single potency accord with D3-D400. They have recently added all four vaccines (AstraZeneca, BioNTech, Moderna and Johnson & Johnson) and Graphene oxide*. BioKat M V practitioners are in the process of developing more effective drainage methods.

If you have BioKat remedy software packages, please contact Ms. Gaby Alexander at g.alexander@bio-kat.de for details, pricing and delivery.

* **Notes:** It has been “rumored” or “claimed” by some that another one of the challenges with the vaccines (in particular Pfizer for this), is the inclusion of graphene oxide as an ingredient. It is certainly not listed in any literature I’ve seen (but then neither was mercury even when relabelled as Thiomersal in past vaccines) and is being decried by the experts as “false” after “fact checking” completed. BioKat has included a vial for Graphene oxide in their test sets – the answer? Test, test, test . . .

“Graphene is a single layer (monolayer) of carbon atoms, tightly bound in a hexagonal honeycomb lattice. It is an allotrope of carbon in the form of a plane of sp²-bonded atoms with a molecular bond length of 0.142 nanometres. Layers of graphene stacked on top of each other form graphite, with an interplanar spacing of 0.335 nanometres. The separate layers of graphene in graphite are held together by van der Waals forces, which can be overcome during exfoliation of graphene from graphite.”

Ondamed: In a recent newsletter from **Silvia Binder, ND, PhD**, of the Binder Institute for Personalized Medicine, she outlined a Post Covid-19 Vaccination protocol of Four Treatment Sessions to be utilized immediately following each course of vaccination. If you use Ondamed but do not get their newsletter, please visit their website here to subscribe: <https://binder-institute.de/>, and here is where you can find this issue: <https://mailchi.mp/ondamed.de/ondamed-protocol-post-covid-19-vaccination>

Selected Pharma / LARET (PRT): This is a high quality traditional homeopathic pharmacy with **no** virtual test sets or remedies. The majority of the remedies are based on the work and research of **Dr. Dr. Helmut W. Schimmel** during the final years of his life working with **Photon Resonance Testing**. They still carry several test sets that are used for VEGA and PRT type testing and the original FM Complexes.

However, here is the protocol they sent me regarding Covid:

- EU C1 – Prevention 2 x 5 drops daily
- EU C2 + C6 + C30 – Corona therapy, 3-4 weeks 3 x 5 drops. After Tx start again with C1 and C3 (convalescence), with breathing problems add C5
- EU C1, C26, C29 – for vaccinations: start with C26+ C29 14 days before, only C1 on day of vax, then C1m C26 and C29 again for 14 days
- C1 you take always because you can get Corona and give to others.

Remember these are actual and highly effective homeopathic remedies – only a few nosodes. I understand from Ms. **Ute Engelhardt** that they have had no problems shipping remedies into the US and Australia?! These remedies can be tested, but should **not** be used through transfer, duplication or virtually. You can find information, details and pricing on their website at :

<https://www.selected-pharma.com/> (Mr. Google does an adequate translation of their site).

You can contact them at: info@selected-pharma.com

Meripharm: This long standing and highly respective German company has catalogs (in both German and English) full of remarkable test sets (even some of the older Staufen TSs). They also have some excellent information regarding the Polyethyleneglycol (PEG) used in the mRNA vaccines (and some test materials for them).

Page Three: Test Set Resources

Here's the answer I received this morning from Mr. **Jürgen Zilly** at Meripharm regarding Covid stuff:

"At the moment we still can not provide testsets for Covid and the vaccines.

Here in Germany it is really impossible to get vaccine materials, because they are strictly controlled by the State.

Actually we can offer a test for „polyethylenglycole 2000“ a substance that is used in the mRNA-vaccines to envelop and protect the mRNA, until it reaches the human cells.

The experience has shown, that this substance can cause severe allergies, when given parenterally. In the attachment I send you some articles covering this theme (unfortunately only in German).

Actually we are working on a testsubstance about graphene, a substance that is supposed to be incorporated in Covid vaccines (what is officially denied).

*In the meantime we got some starter materials, so we could reissue the testkit about the „Biological Index“ according to Dr. Schimmel and also the DNA-stages according to **Dr. Michael Galitzer** and **Dr. Roger Melhuisch** (both really interesting in the actual times).*

In the attachment I send you our actual catalogue about our testkit range and also some lists of rarities and rare KUF-series, that we found in the stock of our former great supplier of ampoules after they shut down their business some years ago.

If you need some further informations please feel free to contact me. "

Please visit the Meripharm website at: <https://www.meripharm.de/wEnglish/index.shtml> and contact them at: info@meripharm.de for catalogs, details, delivery and pricing.

Staufen BCV: Here is all I have collected for this company to date. This is the company formed when the original and very famous **Staufen Pharma** closed several years ago. They have a great virtual program (remedy information recorded from clean amps – even before labeling!). They also have some of the surviving ampule test sets, ampule test series and remedies left over when the parent company closed. Here's what I received the other day:

*"In fact, we are currently working on putting together **an ampoule test kit for vaccinations**. This should then, in addition to potentiated "standard" vaccines (tetanus, measles, smallpox), also contain the various CoVid vaccines. In addition, other important accompanying aids, but above all various viral diseases."*

Visit their website at: <https://www.staufen-bcv.de/> and contact Mr. **Norbert Gschweng** at: info@staufen-bcv.de

MBA GmbH: This German company carries several lines of EAV testing and bioresonance type devices. They offer regular training courses in Germany. They also handle virtual (software) and actual test sets of various kinds. They are notorious for not answering communications, but are a reputable and long standing company in this field. Typically, I have received no responses to my emails requesting Covid test set information. They do have several sets with vaccinations, but so far nothing published about Covid. Check out their website at: <https://www.mba-gmbh.de/> and you can try to contact them at: info@mba-gmbh.de

There is a lot to do, as the great Dr. Herrmann says. Test, test, test is the key now.
