## Under False Flag

### The Histological Findings Explain the Fatal Vaccine Damage

An Interview with Dr. med. Christian Fiala, by Angelika Fischer

From an article in *raum&zeit*, Volume 43, Issue 254, March/April 2025

Translation & redaction by: Carolyn L. Winsor, P2P Consulting

The mRNA vaccination has forced our body cells to produce foreign proteins so that the immune system can arm itself. The physician **Dr. med. Christian Fiala** is convinced that unfortunately the shot backfired,. According to him, the findings of **Prof. Arne Burkhardt** and his team document that this novel technology has positioned the immune system against its own cells.

**Angelika Fischer:** *Dr. Fiala, you knew Prof. Arne Burkhardt personally and also wrote the foreword to the atlas that has now been published, which presents the Corona vaccine damage from the view point of some pathologists. How do you assess the work of these researchers?*

**Dr. med. Christian Fiala:** For me, it was a great project that Prof. Burkhardt started. He was already retired and reactivated his laboratory to do this research. It is thanks to him that the

effects of the Corona vaccinations were viewed under the microscope. Burkhardt used his private funds for this, but also received support from the association "Physicians and Scientists for Health, Freedom and Democracy", e.V. (MWGFD), thus the association of which Sucharit Bhakdi is honorary chairman. Later, other pathologists such as Walter Lang and Ute Krüger also supported him.

### Damage from Viruses or from Vaccines?

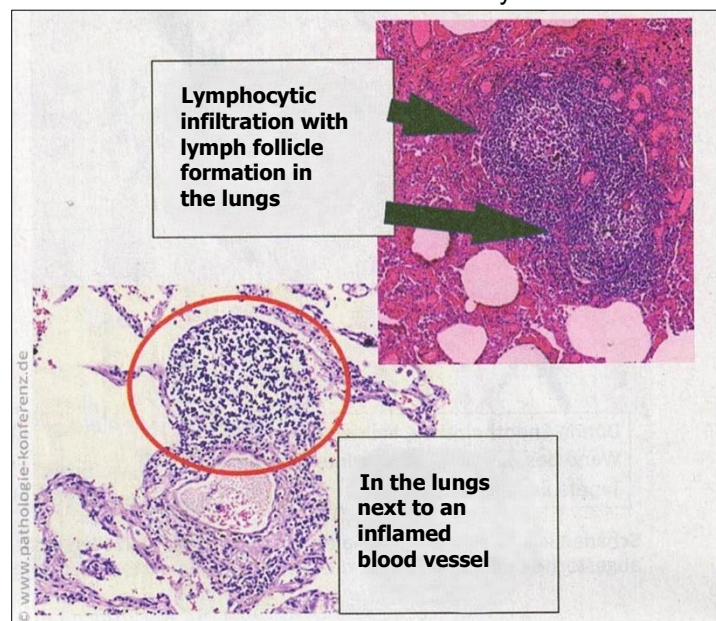

**r&z:** *The authors of the atlas describe abnormalities in the tissue that should not have existed before the mRNA vaccination was used. How certain do you consider that these changes were actually triggered by these vaccines? Couldn't they also be reactions to the virus?*

**Dr. C. F.:** You can clearly distinguish between the body's reactions to vaccination and corona infection. On the one hand, this is made possible by the different staining of the spike protein and nucleocapsid: With the vaccination, only the blueprint of the virus is administered, so to speak. It does not contain nucleocapsids, therefore not the main proteins of the virus. This means that if no nucleocapsids are visible in the histopathological findings, there is no indication that an infection has taken place.

In addition, SARS-CoV-2 infection primarily takes place in the respiratory tract. Viruses that spread outside the respiratory tract in the body are quickly destroyed by the immune system, so that there are no larger accumulations of viruses there. However, the findings of vaccinated people show abnormalities in all organs.

#### Basic Observations

Lymphocyte accumulation/formation of a new lymph node  
- found all over the body

Massive accumulation of lymphocytes in the lungs

## The Mechanism of Damage

**r&z:** *The pathologists led by Burkhardt have already developed initial explanations of the disease-causing mechanism of action of the vaccinations. Could you explain these connections?*

**Dr. C. F.:** In the classic vaccination, the vaccinated person receives a weakened pathogen that can no longer multiply and which the body's defenses recognize and destroy with antibodies. The immune system remembers this pathogen and is prepared for the next time. With the new technology, the body is given the blueprint for this distinguishing feature: the spike protein. Normally, the spike proteins are only on the virus, but now the body's own cells are stimulated to produce the spike protein. The body's own cells then carry – figuratively speaking – the opponent's flag. As a result, the body's defenses are misled and, along with the antibodies against the spike protein, also destroy the body's own cells. This leads to inflammatory processes and cell destruction.

Burkhardt found these traces of struggle in the tissue. Only under the microscope can such traces of spike proteins and subsequent defense processes of the body be seen.

**r&z:** *Can you describe such a trace-of-struggle in more detail?*

**Dr. C. F.:** When the mRNA vaccine circulates through the body, it does so through the blood vessels and first comes into contact with the cells that line the blood vessels, therefore the endothelial cells. These are important so that the blood vessels are thick. Through contact with the vaccine, they now produce spike proteins. Immune cells that are in the blood system, so-called lymphocytes, then attack these endothelial cells and destroy them. The dead endothelial cells are then transported further in the blood vessels, whereby they to become narrower and clogged. Such blockage by dead endothelial cells never existed in the past.

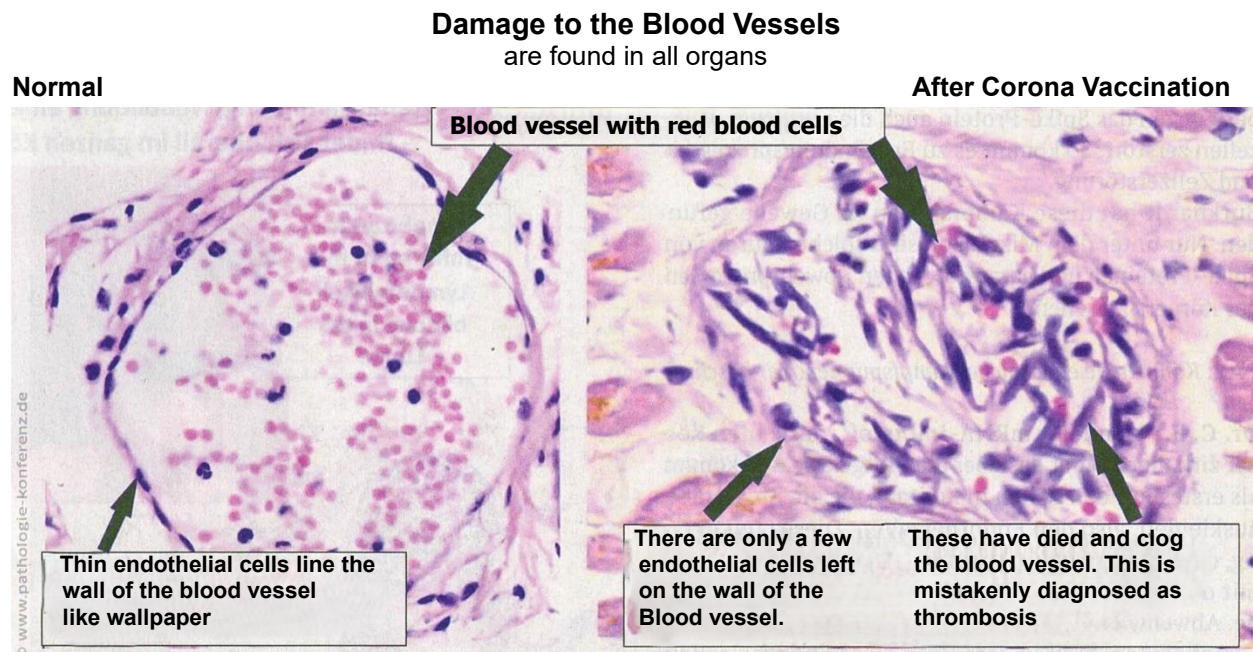

In addition, the perished endothelial cells can no longer seal the vessels, which can have dramatic consequences. If this happens in the brain or in the aorta, it can lead to immediate death. (see image next page.)

## The Fight Against Their Own Cells

**r&z:** *So the vaccines cause the body to wage war against itself?*

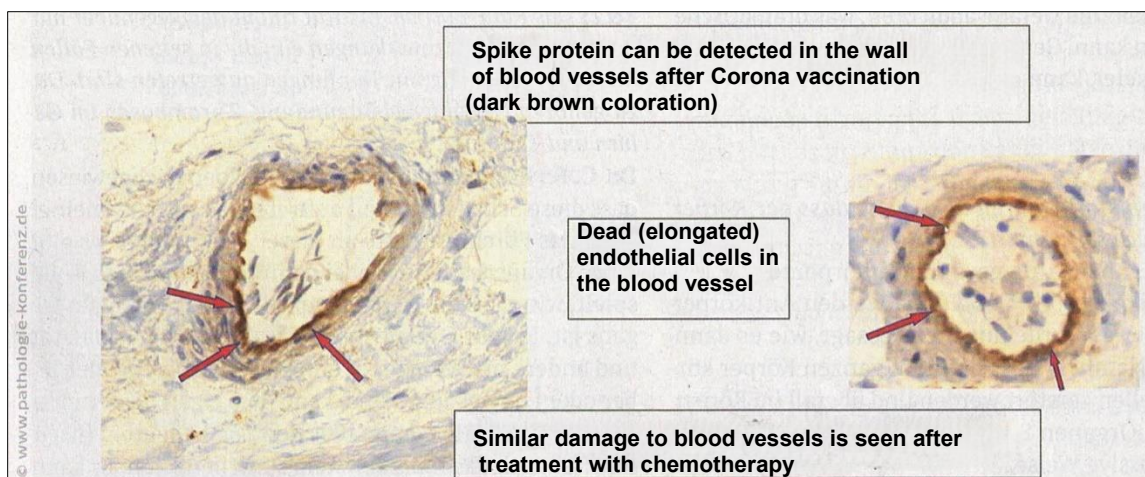

**Dr. C.F.:** Yes, we were told that the body's cells produce spike proteins and then antibodies are formed. But we were not told what would happen next. Namely, that in the entire body the body's own cells are then destroyed, and everywhere in the body and in all organs damage occurs, and sometimes in a massive way.

In a vaccination there are 2 times 10 to the power of 12 of lipid nanoparticles in which the mRNA is enveloped. That is an inconceivably large number that hits 35 times 10 to the power of 12 body cells. This means that there are so many lipid nanoparticles in a corona vaccination that 6 percent of the body's cells can be infected. They are randomly distributed. The first cells they meet are the endothelial cells. Such destruction of body cells is something completely new in the history of mankind. This just leads to cardiac deaths of athletes, cardiac arrhythmias, cerebral haemorrhages, hormonal glands that fail, massive losses of sperm quality in the testicles of men. Because vaccination can lead to so many different symptoms, it is difficult to determine the cause.

Damage to blood vessels. Normally, endothelial cells are not seen in the blood vessel; here, however, you can see masses of dead endothelial cells that block the blood vessel. In contrast, endothelial cells are missing on the wall of the blood vessel.

### Spike proteins are found in the damaged blood vessels

Here, spike proteins were stained brown. You can see that they sit on the edge of the blood vessels. Lymphocytes (black dots) indicate that a fight is taking place here.

On the right you can see a loosening in the wall of the blood vessel. If too many cells are destroyed, the blood vessel bursts, which can lead in the heart to a heart attack or in the brain to an aneurysm.

**r&z:** *The Paul-Ehrlich-Institute, on the other hand, admits only a few side effects that have occurred in rare cases in connection with vaccinations. These include myocarditis, thrombosis in the brain and tinnitus.*

**Dr. C. F.:** Burkhardt and his team have proven that this damage occurs everywhere. In my view, this is the most terrible thing about this technology, there is no organ specificity. Of course, how large the reserve capacity of the respective organ is always plays a role. There are organs with greater reserve capacity and others with less. If some cells in the liver or lungs are broken, the organ can continue to work, in the heart this can mean death. Overall, the immune system is also severely affected. It can be very weak, or it can cause autoimmune diseases or cancer.

**r&z:** *Various doctors and naturopaths report that the Corona vaccinations have led to turbocancer, thus cancer that leads to death very quickly. Can this also be explained by the findings of the pathologists?*

**Dr. C. F.:** Yes, this can be explained by the fact that the immune system is weakened by the mRNA injection. Normally, the immune system destroys cancer cells. If it has been weakened by the vaccination, it can no longer do so.

### **The Matter With the Batches**

**r&z:** *In total, the pathology team examined 89 deceased people and tissue samples from 75 living people – can this be considered representative of the millions of vaccinations administered?*

**Dr. C. F.:** Yes, insofar as the mechanism of action has been revealed. Burkhardt, Ute Krüger, and Walter Lang were able to make visible what exactly happens in the body. It is also interesting to take a look at the relationships with batches (production cycles).

There were enormous quality problems in the production of the vaccines, as could be seen on the official website of the Vaccine Adverse Event Reporting System (VAERS), a reporting system of vaccine side effects in the USA. This can be explained by the great pressure under which a huge amount of vaccines had to be produced in the shortest possible time. Certain production cycles have a lot of side effects, very many have none at all.

The Vaccines Working Group of the Physicians for Education examined these batches and found that those with the greatest side effects had the best quality. Those with poor quality had defects in the lipid nanoparticles. mRNA was packaged in lipid nanoparticles, these lipid nanoparticles were defective, which meant that mRNA was no longer protected and therefore no longer effective. The batches with poor quality had no side effects, the batches with good quality were very dangerous. Thus, the Corona vaccinations were like Russian roulette.

**r&z:** *So there are some factors that play a role in the question of what damage a vaccine causes in individual cases.*

**Dr. C. F.:** Yes, the batch, the reserve capacity of the affected organ, then also the way the vaccine was injected. It should not be injected directly into a vessel because the mRNA then spreads at high speed in the body. And then, of course, how often they were vaccinated. Because if six percent of the body's cells have been reached each time, the probability of damage increases.

The mRNA leads in an intentional manner to an autoimmune destruction of the body's own cells. This was never admitted publicly. It's like Hansel and Gretel when they finally come to a hut with light in the dark forest. You think vaccination saves us from the virus against which the body forms antibodies, but there is still the witch.

The mRNA vaccination forcibly leads to tissue destruction with possible fatal consequences analogous to a rifle bullet. The Medical Association in Austria imposed a fine of 23,000 euros on me for three disciplinary proceedings because I said that. The fact that the Medical Association reacted in this way shows me that there is something to my statement. I filed an appeal. The Constitutional Court acquitted me.

**r&z:** *What would you expect from politicians or health authorities?*

**Dr. C. F.:** The immediate cessation of all mRNA injections. Research on the diagnosis and improvement of vaccine damage, a public discourse to hold people accountable who have committed this crime and compensation for people with vaccination complications for the massive deception.

#### The Authors:

**Dr. Christian Fiala, M.D.**, born in 1959, general practitioner and specialist in gynaecology and obstetrics, training in tropical medicine with professional experience in France, Asia (Thailand), Africa (Uganda, Tanzania, Malawi) and Austria.

An interesting quote from the GynMed Clinic for Abortion and Family Planning in Vienna, Austria, where Dr. Fiala is the founder and medical director: *"As men, we are fundamentally dependent on the health and survival of women around us – mother sister, partner, daughter, etc. We should therefore argue for conditions which permit women, who have after all become pregnant through our actions, to end an unwanted pregnancy in the best possible way and without unnecessary suffering."*

**Angelika Fischer** studied Modern German Literature (M.A.) in Munich, is a physiotherapist, alternative practitioner (psychotherapy) and dance therapist.
