## Help With Vaccination Aftereffects

### New Homeopathic Remedies

By Dr. Phil. Rosina Sonnenschmidt, HP

**From an article in raum&zeit, Volume 43, Issue 255, May/June 2025**  
**Translation & redaction by: Carolyn L. Winsor, P2P Consulting**

What can help with side effects of Covid 19 vaccinations? Innovative homeopaths around Rosina Sonnenschmidt have reacted to the current challenges and found new homeopathic remedies that have a specific and real effect.

Rosina Sonnenschmidt describes where she sees the dangers associated with vaccinations and how we can counter them.

Although the renewed Covid epidemic threatened by the Ministry of Health only mutated into the usual winter infections, in the practice we are still substantially busy with the consequences of the vaccination campaign 2020 to 2023. Many regret their multiple vaccinations plus boosters, many suffer from them, many breathe a sigh of relief that they are freed from the stigmatization as opponents of vaccination and troublemakers, and very few have been little harmed by vaccination. All in all, a damning indictment of a culture that is esteemed in Japan even in the imperial family because of our progressive holistic medicine, naturopathy and ecological movement.

### Japanese and German Homeopaths in Dialogue

At the congress of the Japanese Imperial Homeopathy and Medical Society (JPHMA), the chief physician of the largest clinic in Tokyo emphasized that infectious diseases in Japan are significantly decreasing both through the abolition of the legal obligation to vaccinate and through the use of homeopathy and showed this slide (Fig. left). The photo on the right shows Rosina Sonnenschmidt (center) and the President of the JPHMA **Dr. Torako Yui** (left) with the presentation of the new homeopathic remedy "Oleander torimaki".

Let's look at why there was and is vaccine damage and what new drugs are available

### The Holistic View of the Japanese Homeopathic Society

In December 2019, I was surprisingly invited to Japan for the 5th time to the Japanese Imperial Homeopathy and Medical Society (JPHMA) both to participate in a congress as well as to hold a seminar on technological radiation exposure. I was surprised in the highest measure by the reasoning of the chairwoman **Dr. Torako Yui**: *"From the end of February 2020, the year of the metal rat begins, so we have to expect a disease with lung-colon. In addition, despite all the protests, there is also an increase in the high-frequency fields of mobile communications. We have finally abolished the legal obligation to vaccinate thanks to homeopathy, but if the Year of the Metal Rat escalates negatively, we fear that a compulsory vaccination from America and China will come across. We hope you bring good news from Germany again."*

We homeopathically tested the organic seeds of Japanese oleander and since then have often used it successfully in radiation exposure.

### **A Plant to Strengthen the Immune System In the Event of Radiation Exposure**

I was perplexed, but knew that hysteria and exaggerations are foreign to the JPHMA and that its excellent holistic medicine, based on homeopathy and the ecological movement, is characterized by prudence and tolerance. So I took the trip as an opportunity to hand over a new medication to the Japanese, including a book of mine about Oleander torimaki in an English version. The book describes which homeopathic treatment options the so-called Japanese oleander offers. With a team of 32 therapists, we had homeopathically tested the organic seeds of Oleander torimaki in 2018 and have since used them successfully for radiation exposure. The Japanese were the first to understand the connection between modern radiation exposure and the consequences of vaccination and therefore were delighted with the new medication "Oleander torimaki". This oleander has a perfect immune system; it flourished shortly after the atomic bomb was dropped on Hiroshima and Nagasaki!

### **Mobile Communications Weaken the Immune System**

What most people are not aware of, because they are kept in the dark by the mobile phone industry, is the connection between progressive microwave exposure and progressive susceptibility to infection. In Germany, we have a limit of 9.5 million  $\mu$ Watts. From 1,000  $\mu$ Watt, the blood-brain barrier already opens, so that all kinds of foreign substances – viruses, bacteria, foreign proteins, parasites, etc. – enter the brain. From 100  $\mu$ Watt the hormonal system suffers, from 200  $\mu$ Watt the cell membrane suffers, so that cell communication no longer works. The Wi-Fi router radiates permanently with a power of 16,900  $\mu$ Watt.<sup>(3)</sup> Adapting to this as a human needs **time**. But since everything is supposed to get even faster, homemade diseases arise as a result of an increasingly deteriorating immune situation. Against this background, it is certainly clear that vaccination can only stop the surge of susceptibility to infection to a very limited extent.

### **The Questionable Thing About Covid Vaccinations**

First of all, I would like to make it clear that single vaccinations or inactivated substance vaccinations would certainly have their justification in saving human lives, just think of the tuberculosis epidemic. It's not about black-and-white thinking, but with the Covid vaccines about avoiding education,

- that all new vaccines have not been sufficiently tested
- that nanotechnology was used in the vaccination without educating people about the consequences
- that new two-dimensional carbons (graphene) were used in the vaccine cocktail
- that in the case of a respiratory disease, the intestine must also be treated.

### Emergency Kit of Japanese Homeopathy

As a thank you for my lecture and my seminar, Dr. Yui gave me the prescriptions of a set of homeopathic remedies for emergencies at the beginning of the pandemic, which was actually invoked with a lung-colon disease from March 2020 onwards, in order to confront the pandemic acutely and avoid the consequences of compulsory vaccination.

After my return to Germany, I immediately had the same emergency kit made by a German pharmacy. It did a good job of coping with the fear that was constantly fueled by the media and of mitigating the dangerous side effects of vaccinations.<sup>(2)</sup> We continue to use this set for waves of infection and vaccination consequences.

## Transhumanist Technologies

Using healthy common sense, the idea of a collective human experiment to use the new nanotechnology to promote the (delusional) idea of the new branch of research "Transhumanism" was revealed. This is because it is about the future mixing of humans and digital technology, which will be potentiated by virtual "AI robots".

Nanotechnology is an integral part of the robotics industry, and graphene is a celebrated wonder material in the production of these human-like machines. The critical physicist **Dr. Christian J. Meier** writes about this: *"On the one hand, there is the idea of trans-humanism. Its supporters believe that humans can overcome their natural limits by technical means."*

As Meier explains, the trans-humanists are concerned both with perfecting the human being during lifetime as well as beyond the limits of life: *"The greater performance of the technical brains would be due, among other things, to the fact that electronic circuits process signals much faster than the nerve cells in the brain ... The transhumanists also do not want to capitulate to illness and death. By becoming one with technology, these annoying side effects of life can be overcome, they are convinced. A possible means for this is the download of consciousness: Before a person dies, he transfers his consciousness to a computer that is able to take over all brain functions...."*<sup>(4)</sup>

Dr. Christian Meier is one of the few physicists who, in addition to the meticulous explanations of nanotechnology, also have the courage to uncover the machinations in business and industry that have everything in mind except the health of us humans.

## Graphenurn and Detox Nosode: Important Remedies For Vaccination Consequences

In view of this attitude towards us humans and in view of the plan to make humans more and more superfluous through "human engineering" and AI, it made sense to test the new poison graphene oxide, which is contained in many cosmetics, but has also been detected in Covid vaccines including nanoparticles.<sup>(5)</sup>

We did this with 24 naturopaths and physicians and determined on the basis of the drug picture that we have an important remedy available for the treatment of vaccination consequences on the one hand and for the new addictions of digitization on the other. In view of the critical situation of the vaccine manufacturers and the trivialization of graphene, it meant "courage to act" that the pharmacist **Christoph Weller** from the **Isarturm Pharmacy** was willing to produce the new remedy "Graphenum" (D4, D12, C30). On the other hand, pharmacist **Sabine Bäumer** from the **Eisbär Pharmacy** in Karlsruhe was willing to produce a complex remedy for acute and chronic vaccination consequences based on our experience in graphene oxide testing: the "Detox Nosode" (D12, C30, D200).<sup>(6)</sup>

Both in the chaos of the consequences of the pandemic as well as in the chronic consequences of vaccination, it was the gynecologists who first used both drugs through my lectures and seminars and reported healing successes. This drew wide circles in holistic medicine, which also includes naturopaths. The therapists became increasingly aware of the connection between microwave exposure, nanotechnology in the use of the new vaccines and their deliberate bypassing of the blood-brain barrier.

What also came to the fore: Since 2003, the symptom "microwave poisoning" has been in Robin Murphy's large homeopathic repertory and names the old radiation agents such as radium bromatum, X-Ray, Sol. Even the homeopaths had not cared about that. Only now, after the pandemic, do we have modern medicines such as Oleander torimaki, Graphenum and Detox nosode in addition to the old radiation remedies.

## Final Thoughts

As chaotic and difficult, bellicose and frightening as our time is, the holistic treatment of the consequences of vaccination is an example of the courage and willingness of many colleagues to uphold our cultural heritage of holistic medicine. Therefore, I consider it a sign of hope and confidence that we make better use of our human intelligence and not delegate it to soulless robots.

## The Author

**Rosina Sonnenschmidt (Hp)**, born in 1947, first earned her doctorate in ethnomusicology and conducted field research in the slums of northern India in the 1970s. However, she renounced a university career and worked as a coloratura soprano at home and abroad for 20 years. At the same time, she was intensively involved in Chinese medicine and homeopathy.

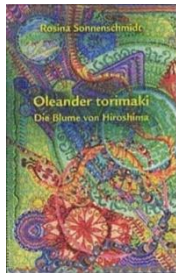

In her practice, Rosina Sonnenschmidt often treats patients with chronic diseases, including severe pathologies such as cancer. The focus of her therapeutic work is on miasmatic homeopathy, mental training for patients and naturopathic healing methods, which form a coherent holistic treatment concept. Rosina Sonnenschmidt's approach is creative and always focused on perceiving the positive potential of a patient with all the senses, because this is

where the patient draws his self-healing powers. She is internationally appreciated as a seminar lecturer and has already published many innovative works on homeopathy and the art of healing.
